

Features

- Configurable and Programmable modules
- Operating Voltage: 8-32V
- Operating temperature range -40 tot +90
- CAN 2.0 B Interface
- Easy to integrate with your existing vehicle, software, design and modules
- Different variants in entire range are possible. Contact us for detail specific solutions and your needs.

Touchscreen/Analog/Rotary to CAN

Logena Automotive is specialized in the development and programming of CAN-networks. Therefore, we are able to deliver different CAN-related products as well.

The CAN-modules above can be used in different kinds of vehicles and can be easily customized to specific demands.
