

Features

- Fits in all OBD sockets
- Fast and secure data pass-thru
- Operating Voltage: 8-32V
- 2xCAN 2.0B Interface
- 1xK-Line Interface
- WiFi 802.11 b/g
- Compliant with latest tablets/smart phones

OBD-to-WiFi Module

The On Board Diagnostics-to-WiFi Module allows its user to obtain relevant vehicle information through WiFi-connections.

Thanks to this OBD-to-WiFi Module, vehicle information such as vehicle speed, battery potential, fuel level and vehicle distance is available for both smart phones and tablets.

Additionally, with this module, users are able to diagnose DTC-codes as well.
